

Welcome to Dental Designs of New England

Thank you for selecting us to help you with your dental care. We pride ourselves on making dentistry a pleasant experience. Our commitment is to provide you with the best dental care possible.

Our primary goal is to help you keep your teeth for a lifetime. We can reach this goal only by keeping you well informed at all times.

On your first visit you can expect:

- an introduction to our office and staff
- a thorough examination and review of your oral health, including necessary x-rays
- a careful evaluation of your dental status
- a discussion of the most satisfactory treatment plan to meet your oral health goals

We strive to practice Comprehensive Dentistry. What does that mean? Our aim is to have all concerns and issues known – to us and to you – and hopefully resolved before an emergency. We want everyone to have healthy, attractive, and stable teeth and smiles. This means that we see patients for many reasons with many different needs. Our services range from routine **preventive** care to life changing **restorative** and **cosmetic** treatment, so we have something to offer everyone to address their personal concern and needs.

The second half of this equation is the development and fulfillment of ongoing maintenance plans. This minimizes the chance of original problems reoccurring. We will do everything we can to customize your maintenance plan based on your individual situation. In a way, "**comprehensive**" care really refers to our commitment to the present and the future of your smile. Not only do we want to keep it healthy, we want to make it beautiful, and make it last.

Enclosed is a registration and medical/dental history form. Please complete and bring them to your first visit.

If you have any questions, please do not hesitate to give us a call. We look forward to seeing you soon.
